GETTING STARTED

1

QUICK START

Simply provide an Administrator's **NAME** and **EMAIL**, and we'll send them a link to create their own password.

That's it. They're ready to log in and start using the site!

2

INDIVIDUALIZED SUPPORT

A complete **USER GUIDE** is always available from inside the LMS, and the Administrator can schedule **one-to-one support** to make sure the site gets set up with the classes and course content needed, and add teachers and students to the system.

3

READY TO LEARN

Students log in with their username and password to see the courses their Instructor has assigned them.

Each course contains a list of topics and lessons, and a student simply clicks the desired icon to start learning.

Students can easily switch between multiple courses assigned to them at any time.

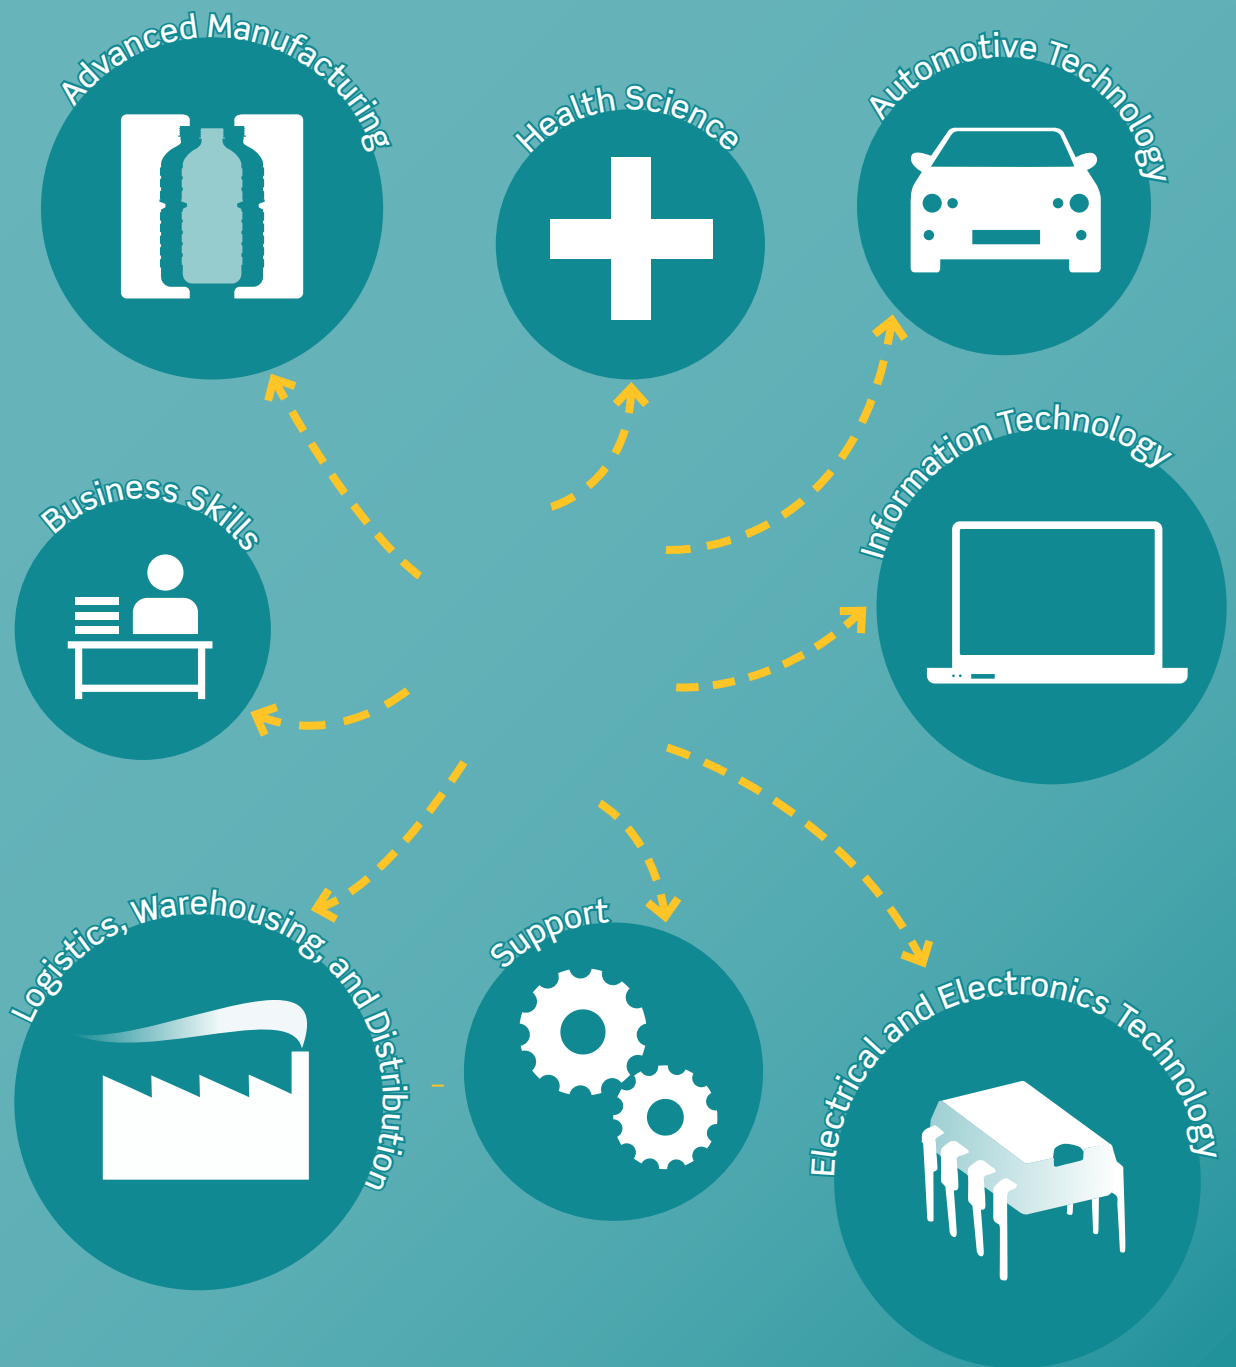

LJCREATE™
Learning for life

COURSES & TOPICS

We have **57 Courses** spread across 8 broad subject areas - each consisting of a series of topics that contain a set of lessons.

Over **1200 hours** of study material!

COURSES & TOPICS

Learning for life

LESSON TYPES

Lessons are divided up into the following types:

- Presentations
- Investigations
- Assessments

PRESENTATIONS

Provide students with the knowledge they need to grasp the key technical concepts in your program.

All presentations include feedback questions and are completely narrated.

INVESTIGATIONS

Provide an opportunity for students to apply what they have learned.

These exciting inquiry-based digital activities and simulators provide an online introduction to the real-world applications of knowledge and skills.

ASSESSMENTS

Each lesson include a short assessment to test knowledge development.

Assessments are marked, tracked, and managed by the LMS.
